Responsive Web Design

Personal Details

Date of Birth: 4th March 2001
Languages Known: English, Hindi
Address: Pune, Maharashtra

Profile Summary

A detail-oriented **Front-end Developer** with over 1 year of experience, specializing in building dynamic and user-friendly web applications using **React.js, JavaScript**, and modern UI frameworks like **Tailwind CSS**. Proficient in creating scalable and maintainable codebases, ensuring optimal performance and seamless user experiences across various platforms.

Work Experience

Software Developer Engineer

SAS Automation Pvt.Ltd, Pune (October 2023 - Present)

Responsibilities:

- TV Monitoring Application:** Developed a real-time data logging application using **React.js, REST APIs, MQTT, Redux**, and **React Charts**, visualizing data across **10+ production units**. Scaled performance to handle **30% higher data loads** and implemented routing for seamless navigation.
- eCommerce Website:** Built a **dynamic eCommerce platform** using **React.js** with a WordPress backend, displaying **100+ products**, implementing cart functionalities, CRUD operations, REST API integration, Context API, and routing, achieving **30% increase in mobile engagement**.
- WhatsApp Notifier Application:** Designed an automated messaging solution using **WhatsApp API by Meta**, reaching over **1,000+ users**, improving marketing outreach by **25%** through scheduled and secure message delivery.
- Static Website:** Created a **one-page responsive website** using **Tailwind CSS**, improving accessibility across **5+ device categories** and reducing load times by **20%**.

Achievements:

- Collaborated with cross-functional teams to deploy the TV Monitoring application, enhancing real-time data logging and scalability across 10+ production units.
- Worked closely with backend and design teams to launch the eCommerce platform in React.js, increasing mobile engagement by 30% through improved user experience.
- Partnered with the marketing team to develop the WhatsApp Notifier application, automating messages for 1,000+ users, boosting marketing outreach by 25%.
